

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food; to ask that the agency's current policies be changed; and to support all the points in docket # 00P-1211/CPI, specifically:

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Additional Personal Comments: *it's only fair that consumers have a choice by reading the label & seeing items are altered*
